

Welcome to The Serpentine Search

All letters within the clue can move in any of up to 8 possible connecting directions. Up, Down, Diagonal, Forward or Backward snaking the grid.

Once a letter is used it is no longer in play.
(For an easier game ignore this rule.)

Some suggest to begin by finding the longest words first to remove the most letters from play.

There will be times when multiple options are available. All will work to solve the clue being worked, however be mindful, your choice may interfere with the solution of another clue.

To get you started on *Serpentines*, the first puzzle shows the first letter of each clue.
